

# morePheus<sup>3</sup> – the complete 3D projection solution for every situation

As a 2-D or 3-D integral system in your office, the morePheus<sup>3</sup> overlooks your entire audience and so elegantly prevents shadows and enhances every presentation room with its fashionable design.

With permanent readiness for use and continuous quality the morePheus<sup>3</sup> enables the full utilization of large-sized projection surfaces, due to its height and extreme bearing load. The projectors of this complete 3-D system can be attached variably up to a height of 2,50m.

The morePheus<sup>3</sup> is a standing projection system in an ageless design, which provides secure safekeeping for all technical components, including the audio system, by integrated lockable boxes. The cable routing is arranged in such an ingenious way, that all cable connections are running invisibly within the system. The morePheus<sup>3</sup> can be accommodated to your personal corporate design by its modular and color-changeable architecture.

The morePheus<sup>3</sup> includes the rack, the software moreMedia HD Premium and moreStereo DX/GL Premium developed by more3D, together with polarization filters and -glasses, two projectors, a high-performance PC with a gyroscopic wireless mouse/keyboard, a sound system and a silver screen.

The morePheus<sup>3</sup> can be used as a front projection system and with an optional additional screen as well as a rear projection system.

If you would like further information about morePheus<sup>3</sup>, the more3D team stands at your disposal anytime. We would gladly assemble a configuration meeting your personal requirements. You can contact us via email under [info@more3d.com](mailto:info@more3d.com) or via telephone under +49 (0)221 677 87 97 0.

With over 10 years of experience, more3D provides superior stereoscopic software and solutions to clients in industry, trade and media and is initiator of the invaZion 3-D Short Film Challenge.

morePheus<sup>3</sup> - the ideal 3-D solution for your conference room.

## Software and 3-D equipment

- Operating system: Windows XP Professional, 64-bit
- moreStereo DX/GL Premium-Software for direct spatial playback of Direct3D applications and OpenGL-applications
- moreMedia HD Premium-Software for the mixed playback of 2D- and 3D-movies and pictures

## Hardware and visual system

- Deluxe polarization filter, linear with 10 pairs of polarization glasses
- adjustable, patented 19"- rack-system
- High-end 19" 3D-workstation with up-to-date graphics card and RAID-harddrive (please ask for recent facts), Full HD capable
- Silver screen
- e.g. Image size 240x180cm
- thx-certified 2.1 sound system with subwoofer
- Projectors selectable from 3000 to 6500 ANSI-Lumen with XGA- up to HD1080p maximum resolution. Individual configurations on request
- Gyroscopic wireless mouse and keyboard with up to 30m operating range
- Dimensions: projection unit 252x53x64 cm
- Optional: INFITEC filtersystem (detachable) for projections on standard screens and white surfaces
- Optional: DeepExploration – CAD Viewer shows nearly all CAD models in 3D-Stereo
- Optional: Rear projection screen

## Highlights

- ✓ Complete system for immediate operational readiness in 2-D and 3-D
- ✓ Lockable boxes and hidden cable routing
- ✓ Arbitrary 3-D filter-system (polarization linear/circular, INFITEC)
- ✓ Premium-quality sound system ensures rich sound
- ✓ Ready to use 3-D with screen, PC and software
- ✓ Modular, expandable rack-system
